## OUR NURSERIES

Are located on Blue Hills Avenue, near Albany Avenue, Hartford, Conn. About one and one-half miles from City Hall. Electric cars (Blue Hills and Bloomfield line) pass the Nurseries every ten minutes.

Visitors at the Nurseries are always welcome.

Not open on Sundays.

**Landscape Gardening.** We are well equipped to make ornamental plantings, and will gladly prepare plans and estimates or furnish advice relative to residence plantings, the laying out of old-fashioned hardy gardens, rose-gardens, etc.

**Guarantee and Claims.** All goods are guaranteed true to name, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. As we have no control over its usage after it leaves our hands properly packed and in good condition, we can give no guarantee on the life of stock; however, any just complaint will receive our utmost consideration.

We do not have Agents. Buy direct from the grower and do away with the middleman's profit and agent's commission.

## Hints for Proper Planting and After Cultivation

Most of the nursery stock that fails to grow is not properly planted or cared for after planting. Care must be given the plant to insure its growth. Water should be used once or twice a week in liberal quantities and frequent loosening of the soil about the plant is essential. Plants received without soil on the roots should have their top trimmed back  $\frac{1}{4}$  to  $\frac{1}{3}$  of the new wood.

Plant only in good soil. Dig holes deep and wide enough to contain the roots without cramping. Pack the earth firmly about the roots but do not fill the hole quite full, leaving a basin to hold water. Allow no manure or fertilizer to touch the roots.

If these simple directions are followed, results will be satisfactory in practically all cases.

## ORNAMENTAL PLANTING

We make a specialty of planting ornamental stock, also lay out grounds, arrange the trees and shrubs, plant them and guarantee them to give perfect satisfaction in every way.

## ROSES AND THEIR CULTURE

**Prepare beds** by using good soil and cow or well rotted horse manure. Beds should be at least two feet in depth. For convenience of customers we offer cow manure put up in bags. See inside last page of this catalog.

### PLANTING

Budded Roses have much stronger roots, and show by an abrupt offset where the bud was inserted and the stock cut off. When transplanted, this junction must be set **3 or 4 inches below the surface** of the ground. This favors the formation of new roots from the budded or top portion and greatly lessens the tendency of the roots to send up suckers, which must never be permitted to grow. The soil should be firmly compressed about the roots, and most of the top should be cut away before planting. If the soil and weather be dry, a good soaking of water may be applied, and then shade the ground and plants with mulching. If shaded by paper or other devices from drying winds until they commence growing, their success will be assured. The season for transplanting hardy Roses is April, May, October and November.

**For winter protection,** draw the soil one foot high about the plants, or even more, if convenient. Manure can be put on for additional protection. It need not be rotted; green will answer just as well, and can be covered under in the spring.

### INSECTS

A weekly application of Bordeaux-Arsenate of Lead Mixture, at the rate of eight ounces to five gallons of water, applied with sprayer, under side of foliage, during growing season will keep roses free from almost all insect pests and fungous diseases. A mulching of two inches of tobacco stems covering ground is very beneficial.

A liberal use of cold water, sprayed with force from the hose nozzle on the underside of the leaves, will keep the plants free from green fly and other insects.

# WIZARD

TRADE BRAND MARK  
PULVERIZED

## Sheep Manure

Wizard will make your lawn and garden the envy of the neighborhood. This natural, weedless fertilizer supplies the humus and plant food necessary to make all plants grow to perfection.

**FOR LAWNS.** Wizard produces thick, velvety, green lawns of lasting beauty. When making new lawns apply 10 lbs. to 100 sq. ft. and rake into the surface soil. On old lawns apply 6 lbs. to 100 sq. ft. just like you would sow seed.

**FLOWERS AND SHRUBBERY.** Luxuriant green foliage and a wealth of vivid colored flowers quickly follow the use of Wizard. Give your plants a chance to develop their real beauty by mixing a handful of Wizard with the soil

under new plants — more for shrubs, vines and trees. On established plants apply 10 lbs. to 100 sq. ft. and rake into the surface soil.

**VEGETABLES AND FRUIT.** Every gardener will tell you there is nothing better than sheep manure to produce big crops of delicious, tender vegetables. Use 1000 to 1500 lbs. per acre.
